

DRAIN TILE POLICY

It is the policy of the Jefferson County Highway Department that when a resident requires a drainage tile for purposes of a new field or residential entrance, provided the tile is for the explicit purpose of highway drainage, the resident making the request must purchase the drainage tile in accordance with the County Engineer's recommendation for size and length. The County Highway Department will install the tile within a reasonable time frame. After the tile is installed, it becomes the property of Jefferson County and will be maintained by the Highway Department in perpetuity.
